Own a Piece of Caterpillar History.

Oh, what a century it's been! When C.L. Best and Benjamin Holt came together to form Caterpillar Tractor Co. in 1925, could even these visionaries have foreseen what was to come? A Great Depression, the effects of two World Wars, unprecedented advancements in all forms of technology – world-shaping events have been in ample supply over the past 100 years.

Through it all, Caterpillar has been a constant, growing steadily and strategically to become today's global leader in all forms of earthmoving – from landscape work in residential yards, to moving thousands upon thousands of tons of material every day in the world's largest mines.

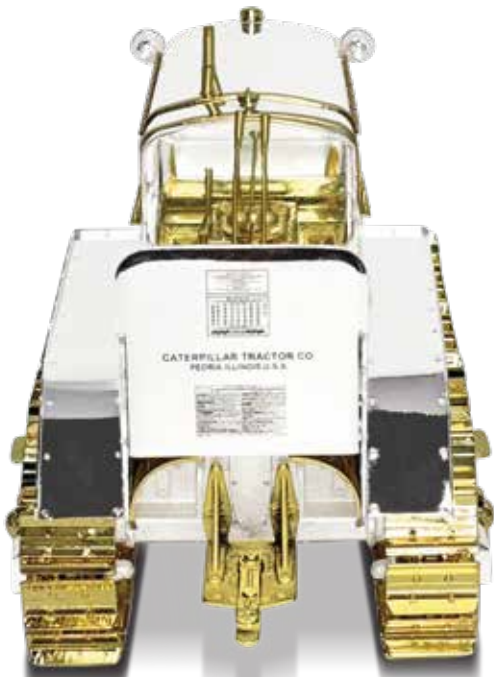

And to think it all started with the Caterpillar Twenty in 1927, the first original, all-Caterpillar design ever produced – a clever package of productivity, durability and aesthetics that established the foundation for all Cat® tractors to follow.

Now, you can own a piece of this legacy, brought to you in 1:12 scale by Diecast Masters. A true piece of collectible art, this luxurious scale model has been meticulously handcrafted to capture each and every detail of the historic Caterpillar Twenty – breathtakingly rendered in the elegance of sterling silver and 24-karat gold over a solid pewter chassis.

There is simply no better way to honor the legacy of Caterpillar than by becoming one of the select few to proudly display this unique scale model in your home or office. Place your order today. Only 250 will be produced!

**LIMITED RUN
Only 250 Units**

Replica weight: TBA

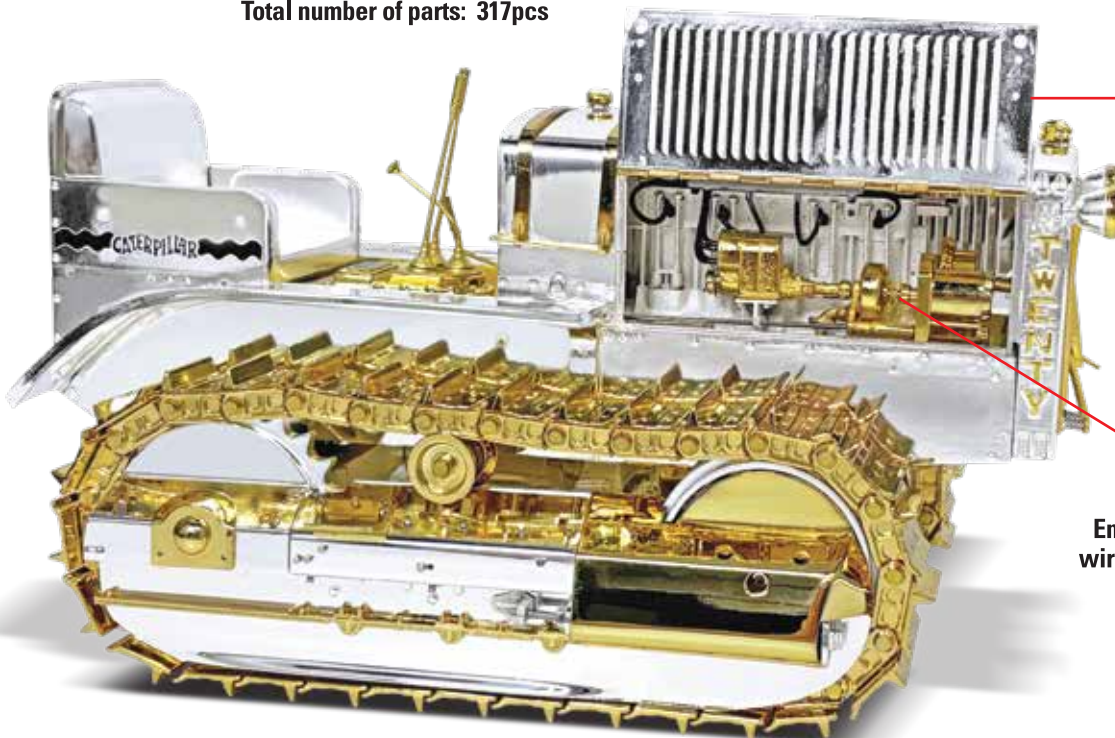

Includes 10 troy ounces
of sterling silver

Also includes zinc, aluminum,
brass, and stainless steel

**AVAILABLE
January 2025**

Total number of parts: 317pcs

Openable engine doors

Engine with details of pistons,
wires, oil pipes, and turnable fan
